

LANCE WHEELER

Altamonte Springs, FL • lancebusiness044@gmail.com • lancewheeler.co • linkedin.com/in/lance-w-a903661aa

PROFESSIONAL SUMMARY

Product Owner with more than eight years across technology and business operations, including four years at Stellar MLS and two years formally in the Product Owner role, promoted four times in three years from the support desk. Owns development-ready backlogs across billing, compliance, data, and internal platform work, translating business requirements into user stories with measurable acceptance criteria. Partners with engineering, QA, and external vendor partners across concurrent projects, and communicates risks and trade-offs to executive stakeholders. Built and governs an internal AI assistant used by more than 10 support teams, and led an enterprise compliance rollout ahead of a hard industry deadline. Certified AI-Empowered SAFe® 6 Product Owner/Product Manager (POPM) and Advanced Certified Scrum Product Owner (A-CSPO).

CORE COMPETENCIES

Product & Delivery: Product Ownership, Agile, Scrum, Backlog Management, Backlog Refinement, Backlog Prioritization, User Stories, Acceptance Criteria, Requirements Gathering, Business Analysis, Release Management, SDLC, QA, UAT, Change Management

Platforms & Systems: Field Mapping and Metadata Standards, Data Ingestion and Validation, Data Quality, Association Onboarding and Data Migration, API and Data Integrations, Billing and Payments Platforms, CRM Systems, Internal Tooling

Strategy & Stakeholders: Stakeholder Collaboration, Cross-Functional Delivery, Vendor Coordination, Executive Communication, Prioritization, Trade-off and Cost-of-Delay Analysis, Dependency Management, Regulatory and Compliance Constraints, Training Materials and End-User Documentation

Data & AI: RESO Data Standards, Adoption and Delivery Metrics, Data-Driven Decision Making, AI Enablement, AI Governance, AI-Assisted QA, Prompt Engineering

Tools: Jira, Monday.com, Zendesk, Salesforce, Microsoft Dynamics CRM, Microsoft Copilot, Microsoft Teams, Slack, Excel, PowerPoint, Snagit, Adobe InDesign, StaxBill

PROFESSIONAL EXPERIENCE

Stellar MLS, Altamonte Springs, FL

Sep 2022 - Present

Product Owner

2024 - Present

Previously Product Specialist I and II (2023 - 2024) and Support Center Technician, Tier 2 (2022 - 2023). Four promotions in three years.

- Support product strategy and execution across a nine-product portfolio serving more than 80,000 professionals, translating business goals into clear product requirements and delivery plans.
- Manage day-to-day backlog prioritization within leadership-set priorities, accountable for backlog contents and for clear, actionable user stories with measurable acceptance criteria.
- Build the field mapping and metadata standards that govern how records are ingested, validated, and used across systems, and contribute to RESO Data Dictionary workgroups that define how records move between platforms.
- Prioritize data quality initiatives and new source integrations, managing product requirements from intake through delivery with a scored process that routes defects and data issues to the right team and ranks the remainder on impact, reach, and level of effort.
- Work closely with technical and business partners in an agile environment, connecting business needs to technical solutions, removing roadblocks, and serving as a primary point of contact between engineering and the business on scope and delivery.
- Partner with design and business stakeholders on user-facing solutions, gathering and documenting product requirements, tracking usability and interface requests separately so they are evaluated on their own merits, and using drafted mockups to align stakeholders before development begins.
- Coordinate product launches including a single sign-on rollout, vendor deliverables, and sandbox-to-production release readiness, then work with operations teams on training materials and end-user documentation.
- Lead the Hernando County onboarding and run QA on the Citrus County onboarding, building commercial lease and sale forms and using AI to analyze field usage and decide what migrates and what is retired, after earlier work on the New Smyrna Beach Board of REALTORS® onboarding.

- Built and govern an internal AI assistant that gives more than 10 support teams real-time, context-aware answers, measurably reducing repetitive support volume, and own its backlog: triaging incoming feedback, verifying real defects, and routing what is not a product request.
- Understand the regulatory and compliance constraints on the products and prioritize accordingly, including leading an enterprise-wide compliance rollout from audit to launch, updating fields, business rules, training, and member-facing content ahead of a hard industry deadline.
- Analyze and report on feasibility, cost of delay, and trade-offs on planned and potential changes, presenting options to executive stakeholders when scope or timeline conflicts surface and flagging risks early.
- Partner with QA on test strategy and acceptance validation before release, writing and maintaining QA and UAT documentation across more than 12 quarterly release cycles with a consistent on-time record.
- Coordinate external vendor development partners so their work lines up with internal priorities, release windows, and architectural standards, and manage the dependencies between vendor deliverables and in-house sprints.
- Applied AI to the QA process for regulatory form updates, reducing a multi-hour manual field-by-field comparison to under an hour per cycle while surfacing defects that manual review had missed.
- Serve as Product Owner for the StaxBill commerce and billing platform and its payment gateway, running annual enhancement cycles and full sandbox-to-production release readiness for dues and renewal processing across roughly 80,000 accounts.

Elite Realty Inc., Orlando, FL

Feb 2017 - Mar 2022

Lead IT Specialist

Feb 2017 - Mar 2022

- Served as the sole IT resource for an entire real estate office, keeping core systems at about 99 percent uptime across hardware, software, and networking for all staff and agents.
- Cut recurring technical incidents by an estimated 40 percent by tracking down root causes and putting proactive security and hardware fixes in place.
